PROFESSIONAL SUMMARY

Computer Science and Engineering graduate with hands-on experience in Python programming, machine learning, data analysis, and model development through three technical internships and academic projects. Experienced in data preprocessing, exploratory data analysis, classification and regression models, model evaluation, computer vision, and developing Flask-based applications and interactive analytics dashboards. Interested in opportunities in Python Development, Machine Learning, Data Analysis, and Data Science.

TECHNICAL SKILLS

Programming & Databases: Python, SQL, PostgreSQL
Data Analysis: Pandas, NumPy, data preprocessing, exploratory data analysis (EDA), feature engineering
Machine Learning: Classification, regression, Random Forest, Decision Trees, Support Vector Machines (SVM), KNN, MLP, model evaluation, hyperparameter tuning
Computer Vision: OpenCV, image preprocessing, Principal Component Analysis (PCA), Linear Discriminant Analysis (LDA)
Frameworks & Visualization: Flask, Streamlit, Plotly, HTML, CSS
Tools: Git, GitHub, VS Code, Jupyter Notebook, Render deployment

PROJECTS

1. Social Media Marketing Analytics Dashboard (Final Year Project) | Python, Streamlit, Pandas, NumPy, Plotly, Pytest
• Developed an interactive analytics dashboard to turn social media data exports into marketing insights.
• Added data validation checks for missing metrics, invalid engagement values, and structural anomalies.
• Created visualizations for engagement distribution, posting activity, and trending hashtags.
• Included a What-If planning component based on historical benchmarks to explore potential campaign outcomes.
GitHub: github.com/SaiBhaskar20/driving-marketing-success-through-social-media-analytics

2. Harvest Helper — Smart Crop Recommendation System | Python, Flask, Scikit-learn, OpenWeatherMap API, NumPy, HTML/CSS
• Built a crop recommendation web application with crop and fertilizer guidance.
• Used a Random Forest classification model to generate crop recommendations from agricultural input parameters.
• Integrated OpenWeatherMap API data to retrieve local weather indicators such as temperature and humidity. .
GitHub: github.com/SaiBhaskar20/harvest-helper

3. Heart Disease Prediction System | Python, Flask, Scikit-learn, Pandas, NumPy, HTML/CSS
• Built an educational web application that estimates heart-disease risk patterns from user-provided health attributes.

• Created a web form using 15 input attributes and displayed model-generated results in an accessible interface.
GitHub: github.com/SaiBhaskar20/heart-disease-prediction

4. Facial Recognition Pipeline Using Statistical Subspaces | Python, OpenCV, Scikit-learn, Jupyter Notebook, Matplotlib

• Built an image preprocessing pipeline using grayscale conversion, contrast normalization, and consistent image sizing with OpenCV.
• Applied Principal Component Analysis (PCA) for dimensionality reduction and Linear Discriminant Analysis (LDA) to support face classification.
• Evaluated an MLP-based classifier and documented 69.91% classification accuracy on the held-out test split.

INTERNSHIP EXPERIENCE

1. AI/ML Intern — Elite Solutions Company | May–June 2024
• Worked on AI/ML internship tasks involving Python and machine-learning concepts.
2. Data Science Intern — MetaCourses | May–July 2025
• Practiced data science workflows and data analysis concepts through internship activities.
3. AI Intern — Internship Studio (iStudio) | July–August 2025
• Completed AI-focused training and project work, including computer-vision concepts.

EDUCATION

B.Tech, Computer Science and Engineering — Welfare Institute of Science, Technology and Management, Visakhapatnam | Oct 2022–Apr 2026 | CGPA: 8.00/10

Intermediate M.P.C — Government Junior College, Polavaram | Jul 2020 – Apr 2022 | Marks: 940/1000

SSC — Nagarjuna E.M. High School, Polavaram | Jun 2019 – Mar 2020 | Marks: 509/600

CERTIFICATIONS

• Python Libraries for Data Science — Simplilearn SkillUp (July 2025)
• Python 101 for Data Science — IBM Cognitive Class (July 2025)
• AI Internship — SkillDzire (AICTE & APSCHE), May–June 2024
• Data Science Internship — MetaCourses, May–July 2025
• AI Internship & Training — Internship Studio, July–August 2025
